EXPERIENCE

HIGHRADIUS TECHNOLOGIES | SOFTWARE DEVELOPER INTERN

Aug 2021 – Current | Hyderabad, Telangana, India

- Developed an Integrated Payment Processor transactions such as Tokenization, Authorization, Sales, Refund, Capture and Void via SoapUI and Json format.
- Worked on 3d-secure transactions and level 2 and 3 integration as well.
- Payment processing is how businesses complete credit card and debit card transactions. Payment processing services expedite card transactions, and payment gateways securely transmit data so money from a customer's issuing bank can be transferred to a merchant's account.

HOWYOU DOING! | FREELANCER

July 2021 – Current | India

- Developed a website using Html, CSS, Bootstrap, ReactJs as a frontend technology.
- Backend Technology used were Spring and its framework.

PROJECTS

LIBRARY MANAGEMENT SYSTEM | SPRING MVC, HIBERNATE (ORM FRAMEWORK) AND MySQL (FOR MANAGING RDBMS).

2020

- Management systems mostly use software across all schools and colleges to keep record of data. One such System is Library Management System, which is used to keep record of books present in a library.
- These Systems comprises of information regarding Books, where we can perform all the operations that are required in an actual system such as CRUD operation, advanced search, book issuing, and also to store the information within files using the process known as Serialization.

BREAKOUT BALL GAME | JAVA SWING, JAVA AWT, JFRAME, JPANEL

2019

- Breakout Ball game is a widely used game which was developed in the 1970s. In Breakout, a layer of bricks lines the top third of the screen and the goal is to destroy them all. A ball moves straight around the screen, bouncing off the top and two sides of the screen. When a brick is hit, the ball bounces back and the brick is destroyed.
- The player loses a turn when the ball touches the bottom of the screen; to prevent this from happening, the player has a horizontally movable paddle to bounce the ball upward, keeping it in play. The player uses the platform to keep the ball running. The goal is to break the bricks without missing the ball with your platform. The project makes use of Java swing, OOPS concepts and much more.

NEWS APP | JAVA, SQLITE, CUSTOM RECYCLER VIEWS IN ANDROID

2018

- The purpose of the project is to develop an application which will display news articles and videos verified and approved at backend. User can browse news articles and videos through various categories. App will enable user to view news details, images, and video.

SKILLS

PROGRAMMING

Proficient:

Java • C • SQL
CSS • HTML

Experienced:

JavaScript • C++

Familiar:

Python • Shell • ExtJs

LIBRARIES/Frameworks

jQuery • React • Spring •
Hibernate • Struts •

TOOLS/PLATFORMS

Git • Jira • GitLab • Heroku
Netlify • Firebase

SOFTWARE

Eclipse • Visual Studio Code •
Android Studio • IntelliJ

EDUCATION

CHITKARA UNIVERSITY

BACHELOR IN COMPUTER SCIENCE

Aug 2018 - Present | Solan, Himachal Pradesh

School of Computing

Cum. GPA: 3.85 / 4.0

ST.XAVIER'S INTERNATIONAL SCHOOL

NON-MEDICAL

May 2018 | Patiala, Punjab

Cum. GPA: 73.4 / 100

CERTIFICATES

HackerRank, Java Certificates,
5 Star
